

9.30

Set up connections

9.35-9.40

Welcome

9.40-9.55

Elisabetta Boeri Erba (Institute of Structural Biology)

MS on intact proteins and macromolecular complexes: the role of MS in Structural Biology.

10-10.40

Thomas J. D. Jørgensen (University of Southern Denmark, SDU)

Present and future of high-resolution Hydrogen Deuterium exchange MS (HDX-MS).

10.40- 11.05

Markus Hartl (Max Perutz Labs Vienna)

Cross-linking MS to elucidate structural changes in proteins and their complexes.

11.05-11.25

Christophe Masselon (EDyP group, CEA, Grenoble)

New concept for ultrahigh molecular mass measurements (NEMS) to study intact viruses.

11.25-11.45

Yohann Couté (EDyP group, CEA, Grenoble)

Proteomics and its applications to biomedical research.

11.45-12.00

Questions and final remarks
